OBJECTIVE

Passionate Full Stack Developer skilled in Laravel, Django, Flutter, and modern web technologies. I enjoy building scalable, user-focused applications and collaborating in agile teams. Seeking an opportunity to contribute to impactful projects, learn from experienced engineers, and continue advancing my technical and problem-solving skills.

EDUCATION

Strathmore university 2020 - 2024

- Bachelors of Business Information Technology (BBIT)
Second Class Honors upper division.

Murang'a Elite Boys high school 2016 - 2019

- KCSE mean grade C+
Math B, English C+

Certifications

- Certificate in Data Protection.
- Certificate in Cyber security (CISCO)
- Certificate in AWS Cloud Foundation

SKILLS, COMPETENCIES AND AFFILIATIONS

Technical skills:

- PHP (Laravel) | Node.Js | HTML and CSS | Django | Springboot |
React.js | TypeScript | MySQL and MongoDB | BluePrism | NoSQL |
Flutter – Dart | Kotlin | Google Firebase | Supabase
- Strong analytical | Problem-solving | Critical thinking skills.

Professional skills:

- Ability to work independently and in a team environment.
- Excellent communication and interpersonal skills

EXPERIENCE

Ecobank Kenya

Role: Software Developer

Apr 2025

- Building automated software solutions using Laravel and Flutter for internal and customer-facing applications.
- Designing and consuming RESTful APIs to ensure seamless data integration across services.
- Collaborating with cross-functional teams (designers, project managers, analysts) to ensure Agile-driven delivery.
- Participating in code reviews, testing, and the full software development lifecycle (SDLC) per Ecobank's standards.
- Troubleshooting and optimizing existing code to ensure efficiency, maintainability, and scalability.

Creatives Garage (NGO)

Role: Web and Mobile Application Developer

May 2024 - Apr 2025

- Maintaining their existing systems.
- Building custom mobile application like Mzalendo
- Improving their websites by adding new functions and pages.
- Worked as the IT support for the organization.

Kenyatta University Teaching Referral Research Hospital

Role: Web Application developer attachee

Jan 2023 – Apr 2023

- Played a key role in developing a comprehensive web application using Laravel at KUTRRH.
- Built the entire system from the ground up with my team.
- Introduced a round-robin scheduling mechanism to efficiently assign groups of nurse interns to various wards during their six-month internship.
- Successfully deployed the application, showcasing technical proficiency and effective teamwork.
- Addressed the complex task of managing intern placements within the healthcare institution.

Texas Cancer Center

Volunteer work

Jan 2021 – Mar 2021

- Engaged in diverse responsibilities, including housekeeping, bookkeeping, and data entry, during my time volunteering at the Texas Cancer Center.
- Gained hands-on experience in various aspects of operations.
- Enhanced communication skills and boosted confidence through direct interactions with patients.
- Broadened my skill set and established a meaningful connection to the community.
- Developed a deeper understanding of the challenges faced by individuals in a healthcare setting.

Palla Credit Limited

Business Developer Intern

Jan 2024 – Mar 2024

- Collaborated with GG Reuben, a holding company for Palla Credit and RiverCourt Property Management.
- Gained a comprehensive understanding of their operations, identified areas for improvement, and developed strategic solutions.
- Proposed workflow automation software and targeted training sessions to streamline processes and improve efficiency.
- Recommended establishing a customer feedback mechanism and regular service quality assessments to enhance customer satisfaction.
- Formulated short-term and long-term goals to drive the company's development strategies.

PERSONAL PROJECTS

- Apprentice: Web application connecting young IT practitioners with industry experts for mentorship, networking, and projects (built with PHP).
- Temperature Prediction (Nairobi): Machine learning model predicting Nairobi's temperatures using historical data (R).
- SkyCast: Mobile weather app developed with Flutter (Dart) and OpenWeatherAPI to provide real-time weather updates for any location.

PERSONAL INTEREST

- Photography and Drone flying.
- Attending Tech show and events.
- Art

ACHIEVEMENTS

- Designed and implemented a digital lending scorecard and developed mobile app interfaces to improve user experience and decision-making.
- Singlehandedly built, tested, and deployed the “Mzalendo” Android app, leveraging Kotlin to deliver a smooth, intuitive experience — now live on the Google Play Store.
- Developed an automated Bank-to-Customer (B2C) reconciliation system, integrating M-Pesa and banking transactions to enhance financial accuracy and efficiency.
- Redesigned branch forms, reducing paper waste and operational costs while improving customer experience across multiple African affiliates
- Built an AI-driven Human Resource system with a smart chatbot assistant capable of filtering potential employees and responding to staff queries based on organizational policies.
